Besides, there were present the good counties the grain's reported as visitors Rev. C. D. Barrows, plump, heavy and clean. In the south-pastor of the First Congregational plump, heavy and clean. In the souther counties of Los Angeles, San Diego and San Luis Obispo, the May rains have done much good; also in the San Joaquin Valley, where, a month ago, fears were entertained of less than one-third of a crop. Stockton now reports the crops in the San Joaquin in fine condition. Careful estimates place the yield of that locality at over four million bushels. In some sections of Napa Valley rains and high winds have injured the crops. The same is true in some northern counties, where the late rains rusted the grain a good deal, and it will have to be cut for hay. To summarize:

Washington, May 16.—The Society of the Army of the Potomac, whose reunion occurred here to-day, had all that could be desired in point of weather for their street display. During the foremon the air was enlivened with the music of martial bands, and the streets were filled with uniformed bodies of volunteer and regular soldiers. The procession was forty minutues in passing a stand in front of the White House, and was received by the President, Cabinet and members of foreign legations.

A College Reunion.

Cleveland, Ohio, May 16.—The fifty-first annual convention of the Alpha Delta Phi, a college fraternity, began on Fourth street, San Francisco, of \$500.

Probable Murder. The San Diego Sun of Wednesday state that on last Tuesday evening the body of a man in a very much decomposed condition, was found in the vicinity of the Twenty-second street depot. A brief exskull about three inches above the right of the Kansas State Board of Agricul-ture reports that the farmers of that State now hold over five million bushels of old wheat and over thirty-seven milets, and a leather wallet around his neck containing a \$20 gold piece, three thalers (Prussian), and a paper in German. Deceased was dressed in a dark navy-blue woolen shirt, brown vest, overall coat, black hat, blue overalls over brown overalls, and heavy cowhide boots. It is certain that he was either foully murdered or committed suicide, the former being most probable. A Coroner's jury is immediately to investigate the case.

Yesterday a comical circumstance leaked The examination of John S. Gray was concluded this morning in the Police Court. He was held on one additional charge of embezzlement and two of forgery, making forty-four charges in all. One charge on each forgery and embezzlement was dismissed. This ends the proceedings in the Police Court.

Superior Judge Edmonds this morning rendered judgment in favor of the city and county of San Francisco against the Central Pacific Railroad Company for \$848, interest due for taxes on har-

reet. Mr. Lambert and his wife, with John Doe, were traveling in their own conveyance, and were from Inyo county. When they stopped at the bridge, Mr. Lambert went to seek a place to put his horses, and Doe took \$380 of Lambert's money and suddenly emigrated. Lambert at once notified the proper authorities, and Doe has probably been esptured by this time.

The City of Mexico is rebuilt. Grand cathedrals are erected from the ruins of heathen temples, and the dead past is buried beneath the walls of newly-constructed palace, hall and church. Of this work of reconstruc-

tion the author says: A plan was drawn for a Spanish quarthe aristocratic Tenochtitlan, a name long preserved even in official records under the corrupt form of Temixtitlan. It was separated by a wide canal from the Indian quarter, which centered chiefly round Tiatelulco, regarded as plebeian long before the conquest. Only a small part was covered by the plan, beyond which the houses afterward extended in striking irregularity as compared with those in the older quarters. In addition to the three regular causeways, two tion to the three regular causeways, two more were added, the support along the aqueduct from Chapultapee being enlarged to a road. The Tlacopan road, or rather Tacuba, as it was henceforth termed, soon became a sort of elongated subther larges to the appropriate that the Indian p urb, owing to the numerous vegetable gardens which sprang up on either side of it. The famous levee which protected the southern front of the city from the waters of Xochimilco lake, and had served was a resort for traders and promenaders, was strengthened and named San Lazaro. The quarter was laid out in rectangular blocks, the eastern extension being two as long as the northern, and distributed In the central part hardly any of the filled canals were reopened, but beyond the main channels were left intact, and spanned by stone bridges. Of the two squares in the Spanish quarter, by far the largest was the former central temple court, serving now also for market-place, round which were reserved sites for church, convent, gubernatorial palace, town hall, prison and other public buildings. . Private houses were erected on a scale proportionate to the means and aspirations of the owner, both large in so far as an abundance of free labor and in so far as an abundance of free labor and

A great proportion of the material was obtained from the existing edifices and rains, the incentive for tearing them down ruins, the incentive for tearing them down being increased by the hope of finding treasure. At this part of the work the Spaniards were foremost, and in their vandalistic strife monument after monument of Nahua art was razed, particularly the finer edifices. Even the huge pyramidal structures supporting the temples disappeared, for within them were graves of princes and nobles known to contain treasure. for within them were graves of princes and nobles known to contain treasure.

Materials, especially for façades, were also obtained from the many quarries in the neighborhood, notably tetzontli, a red, porous yet hard stone, and a kind of porphyry. Oak, cedar and cypress were abundant round the lake and in the surroundant roundant roundant

Prepared especially for killing Squirrels, Gophers, Rats, Ants, Moths, Weevil, Phylloxers, Scale, Lice, &c. Is a liquid, which, when applied, fills the burrow with its vapor and thereby kills every occupant of the hole without injuring anything outside. The animal cannot get away but dies in the hole and never becomes offensive. Comparing it with other poisons we find that strychnine poisoned wheat. Phosphorus &c. are all inferior to the sulphide in being apt to kill the pet dog, sheep, insectiverous bird, &c. The animal may eat them or not as it pleases, and if eating crawls out and creates a stench or poisons the dog, cat or other pet. Read & Foster's Bi-sulphide is safe, cheap and effective, and can be applied by anyone at any time without the least danger. The vapor of this meterial is heavier than sir, and by its pressure reach-eaquickly every crack, crevice or department in the hole, destroying immediately all animals or insects contained therein.

The Carbon Bisulphide is put up in one and three-pound bettles, and six, twelve and fifty-pound cans. Each bottle or can is accompanied by complete directions, and is ready for field work. Manufactured and prepared by READ & FOSTER, Los Angeles Chemical Works. All orders and communications to be sent to Reed & Foster, at factory, or P. O. Box 1262, Jos Angeles city.

convention should vote viva voce. No man sent as a delegate to such a body to represent a constituency has any right, moral, legal or equitable, to vote by secret ballot. Such conventions have become part of our system of government, and they generally, almost universally, select the men who make or administer our laws. As well might a member of the Legislature vote secretly as the delegate to a political convention, for they are both representatives of the people, and their respective constituenpeople, and their respective constituen-cies have an absolute right to know

how, or whether or not they have been The most of our political troubles in California have been caused by secret balloting and its concomitant evil, secret caucusing. That party, whenever formed or re-formed, which adopts as one of its fundamental rules that delegates are but agents or representatives of their constituencies, and not political autocrats for the time being, and therefore shall vote viva voce, will then have made a movement calculated to restore the control of political affairs to the hands in which it belongs, and to destroy the rule of cliques and corporations, and preserve in fact as well as in theory our "government of the people, by the people, and for the people,"

WATER SUPPLY.

These lots are supplied by the pursest of water, as may be seen by the analysis published above. The present capacity of the pumping machinery is 75,000 gallons per hour, or 1,870,000 in twenty-four hours.

The source of supply is inenhaustible. During last winter I laid 4000 feet of 3-inch cast-iron pipe. And I have just completed the laying of 4000 feet more of 8 and 13-inch cast iron pipe, and in a few weeks I will commence the laying of 4000 feet more of 3-inch and 13-inch pipe; also, will lay smaller sizes in considerable quantity, as they may be required.

The new means of cure, Dr. K. Robbins, the success ful Electric and Magnetic Healer, of 119gMain street, between Second and Third streets, who has made so many wonderful cures in this city, is still meeting with immense success. His rooms are crowded daily with patients anxious to get the benefit of his powerful magnetism. The blind see, the deaf hear, the isme walk and the sick are healed by this new development in medical science. Dr. Robbins discards the use of all medicines in his treatment and relies solely on the power of magnetism. An experience of several years in the Australian colonies and this country enables him to assert with confidence that he can cure diseases that baffle the skill of other physicians. He also diagnoses diseases without explanation from the patient free of charge. He would advise all persons suffering from painful diseases to call and see him and get the benefit of his advice. Testimonials have already appeared in these columns showing its ability as a magnetic physician. mail-im
